

# Team Scrum Coach

## Goal is to work on and reflect on your skills to

- Communicate effectively in a variety of professional contexts within a team, doing oral or written presentations, and creating technical documents.
- Function effectively as a member/leader of a team engaged in scrums while participating in different roles

**Points:** 20 (see rubric in canvas)

**Deliverables:** Upload this document as pdf or word and location for scrum stand up meeting (Use canvas panopto video to record or to upload the video file) and scrum sprint document containing team sprint information and agenda.

**Due Date:** See canvas.

## Scrum Coach

[Before you start the GE Sprint](#)

[After the GE Sprint](#)

## As a team member you should

- Update the planning board for your tasks
- Contribute to the team technical documentation
- Assist in trouble-shooting issues

## Before you start the GE Sprint

Answer the following in your own words

Read [What is a Scrum?](#) Pick at least two scrum values you want to help your team develop

as the scrum lead for this GE sprint. Explain how you plan on fostering those values with the team.

Focus: Even from the previous GE, I thought our team was very focused from the beginning. I hope to keep everyone focused and on track for this GE by checking in with them when needed and being open about any issues or problems I might encounter myself.

Respect: Just like the focus aspect, everyone has been super respectful and helpful for each other from the start. I am most certain that everyone is going to be respectful to each other this time around as well. I want to help my teammates keep being respectful to another to be capable and independent by being open. I will try my best to be open about all my work as I expect others to be respectful and open.

Read [The Scrum Coach](#) What is your focus for this sprint to be an effective scrum coach?

To be quite honest, It feels like everyone else in my group already has so much more knowledge than I do in many of the topics. While I cannot be a teacher or a mentor, I want to be a motivator to keep everyone on track for success.

Read [4 Things to Include in Your Daily Scrum Meeting Agenda](#) Share at least 3 important takeaways as you prepare your scrum agenda.

The three important takeaways for me would be first, checking in on their goals, second not over formalizing, and blockers. As we check in every other day, I just would love to know what kind of plans/goals they would have for the day. I also would hate for it to be so formal. We are all friends, I would feel uncomfortable if it is so formal. Lastly, of course the blockers. When I scanned this GE, it seems like this one has a lot less guidance and more finding the answers on your own. I'm sure we will have plenty of blockers. We can discuss possible solutions for the blockers.

What is your responsibility to contribute to the team documentation?

My main contribution for the documentation is models and relationships.

## After the GE Sprint

Make sure your name is included with the part of the documentation you created.

Summarize in a paragraph your experience being the scrum lead.

As a person with some experience in leading (just not in tech field), I thought it went really well all thanks to the great team. As a lead, there really wasn't much for me to do except to check in on them a few times throughout the week, and ask some questions myself. Everyone was on top of their problems and finding solutions very easily. In the end, I really was just a motivator to keep everyone on top.

Reflect on what it was like getting your team to participate in the scrum meeting and in discord.

Scrum meetings went great in both in person and discord. Everyone was very open about either their issues at the time or how they were doing, and even in asynchronous check ins they all responded so quickly. (quicker than me) Also for some of the issues, we were all very helpful for each other on the discord server.

Share 2 of your strengths in this role and one growth area.

I want to say my 2 strengths in this role would be commitment and openness. I felt as I was fully committed to get through this GE successfully as a team by doing my part and making sure everyone else was doing their part as well. I also felt like I was fully open about all the challenges I had throughout the GE.

I still have a lot to learn in scrum lead role. The one area I want to focus more on would be focus. This GE, I did get side tracked quite a bit by all my other classes and their work as well. While I was very open about the setbacks I had during this GE, as a lead I know I should've been more focused on this first.

Share lessons learned that might help the next scrum coach.

Dont be afraid to take charge of the group. Make things happen with guidance and be open about your own problems as well. Team members do appreciate the openness about the lead's difficulties.

List each team member and one strength they brought to the team

Tyler - Did amazing with bringing important information and resources that we needed for the GE.

Chandler - Courageously worked on more difficult issues/problems and brought resources to the team about how to work certain things and where you can find more information about them.

Katie - She was awesome and open about all the issues she was having and reached out for help when needed.

All of the teammates were just amazing, making my job as scrum lead very easy.

If you have any concerns about your team please share.

No concerns.
