

# Scrum Team Member - Juhan Hong

## Before you start the GE Sprint

Answer the following in your own words.

Read [What is a Scrum?](#) Pick at least two scrum values you want to focus on for this GE Sprint. Explain how you plan on bringing those values to the team.

The first thing i want to work on is openess. In the past, for most/all my projects and homework i worked on, i never really reached out to any people for help. Now that I am a member, I want to put some effort in to be more open about what kind of challenges i am having and seek the needed help.

The second thing I would like to work on would be focus. I tend to get very distracted when i am working. I am going to try my hardest to stay focused and finish the work earlier.

What is your responsibility to contribute to the team documentation?

My responsibilities for the team document are defining URL path and view, and creating html template. Along with participating in team checkups.

## After the GE Sprint

Summarize in a paragraph your experience being a member of the scrum team.

My overall experience being a team member was amazing. Since I was putting in efforts to ask questions, and actually talk to my teammates about the issues and the project, it felt like everything was going so smoothly. Everyone in my team was so helpful with answering all the questions I had and kept me in the loop and on top of the project.

Make sure your name is included with the part of the documentation you created.

For the team document, I was in charge of section 2.4(URL path and views) and 2.5(HTML template)

Read [What is a Scrum?](#) Include at least 2 values you feel your team embodied.

I strongly believe that our team embodied commitment and openness. Everyone in the team was very committed to do their part of the work along with lending a helping hand whenever needed. Everyone in the team was also very open about the challenges they and accepting any kind of questions and answering them respectfully and helpfully.

Share 2 of your strengths as a team member and one growth area.

As a team member, I have shown courage and respect as my strength. I openly picked 2 of the (in my opinion) tougher portions of the documents and showed commitment to finish. I was also very respectful and knew everyone in the team will do everything that they can and finish/help the required tasks.

Read [What is a Sprint Retrospective?](#)

Share what went well in the sprint.

I think during this sprint<sup>1</sup>, everyone was very communicative and open about our progress. The scrum coach(Katie) did really well checking in with each of us and everyone else including me, followed along very well. A lot of the difficulties we faced, there were at least one of us posting and helping with difficult challenges and possible solutions to them, making the sprint go smoothly.

Share lessons learned that might help improve your team for the next sprint.

Honestly, overall I thought everyone did amazing and contributed a lot to make everything work as smoothly as possible. I thought the coach and tech lead both did their parts very well along with members including me who were able to do well in our parts. If there is anything that could be improved, maybe we can create a calendar and set our own due dates as a group so we can all come together at the end to review everything.

List each team member and one strength they brought to the team

Aside from everyone being amazing and finishing their work as early as possible,

Tyler: Went above and beyond to help out with some of the struggles I had during this sprint  
Katie: Checked in with me and others frequently and made sure everyone was doing okay.  
Chandler: Brought resources and created a great document template for easy use of the tech doc and the kanban board.

If you have any concerns about your team please share.
