Juhan Hong GE04 Scrum Team Member

Before you start the GE Sprint

Answer the following in your own words.

Read [What is a Scrum?](#) Pick at least two scrum values you want to focus on for this GE Sprint. Explain how you plan on bringing those values to the team.

As being a team member for the second time, I would hope to bring most, if not all of the scrum values. If I had to pick the two I would focus on bringing, I would like to focus on commitment and try to finish my work early, and openness to ask for help and help when asked.

What is your responsibility to contribute to the team documentation?

My responsibilities for the team document is Portfolio detail and student list

After the GE Sprint

Summarize in a paragraph your experience being a member of the scrum team.

This had nothing to do with the team, but on my own. I had a lot of outside of school business going on that I had to take care of, on top of all the class work for the past couple weeks. I did end up falling behind on the GE and my portion of the work. Regardless, everyone on the team was supportive and understanding of my situation and was willing to help out in any way possible. It was amazing. In the end, I did get my portion of the work done with a bit of help from the team.

Make sure your name is included with the part of the documentation you created.

Read [What is a Scrum?](#) Include at least 2 values you feel your team embodied.

As always, I think my team embodied all of the values. Some of the values I feel was more than the other was commitment, respect, and openness. Whoever was struggling with certain part, including me, were very open about our problems. Team members respected each other to be sure to get their part of the work done, and lastly everyone was committed to get everything done.

Share 2 of your strengths as a team member and one growth area.

For this GE, as mentioned before was a struggle for me due to time and other factors. I did not ended up embodying commitment this time around. I think one weakness I could improve on would be commitment and hopefully get my work done earlier in the timeline. If I had to talk about some strengths, I was open about my challenges and respectful to other teammates.

Read What is a Sprint Retrospective?
Share what went well in the sprint.

Aside from all the challenges I have faced, everyone on the team was very supportive and respectful throughout the entire GE. I think my team agreed that GE04 was the toughest one we have done so far and we had to figure out most of the content by ourselves. Which I think it just pushed us to be more communicative and open about what kind of challenges we were facing. Questions were asked, and questions were answered.

Share lessons learned that might help improve your team for the next sprint.

I honestly dont think the eteam needs to improve on anything else. Everyone is still doing amazing at what they do and very communicative about support and questions. If anything, I need to do better on my end to try to be a better team member.

List each team member and one strength they brought to the team

Chandler: Commitment and courage. As the scrum coach for this GE, he took the initiative to tackle all the problems and finish everything before the deadline to help any of us who might be struggling.
Tyler: Communication and openness: Tyler communicated and asked all the tough questions before anyone else.
Katie: Openness: Katie was very open about challenges she was facing and asked the hard questions to get her work done on time as well.

If you have any concerns about your team please share.

No concerns at this time.
